

Sexual Orientation and Gender Identity (SOGI) Resources Support Schools to Create Inclusive Environments

- As educators, we are mandated to ensure our lessons and spaces are inclusive. A good way to think of this is the idea that schools and learning materials should be a mirror in which all students can see themselves, and a window through which students can see the outside community.
- It is essential that we help our students increase their understanding of 2SLGBTQIA+ identities as we work to equip them for teamwork and leadership in our diverse society.
